

## ABSTRACT OF THE DISCLOSURE

The present invention relates to a method for measuring a holoceruloplasmin concentration, and more particularly, to a method for measuring a holoceruloplasmin in a blood spot based on a standard concentration curve obtained through an enzyme-linked immunosorbent assay (ELISA) or a dissociation-enhanced time-resolved fluoroimmunoassay using a holoceruloplasmin-specific polyclonal antibody and a holoceruloplasmin-specific monoclonal antibody.
